

# Which Motorola Baby Monitor to Buy?

# Some Monitor Basics

- Motorola has are two types of baby monitor
  - sound only or
  - video and sound
- Each monitor has two parts
  - the baby unit has the microphone or camera
  - the parent unit has a speaker or video screen
- All Motorola monitors we stock have a rechargeable battery in the parent unit and the baby unit plugs into a powerpoint.

# Some features explained

<b>Feature</b>	<b>Explained</b>
Out of range warning	Will let you know if you walk too far away from the baby unit to hear the signal from the baby unit
Battery operated	Does the parent or baby unit use a built in battery you can recharge or does it plug into a powerpoint
Two way communication	Can you use the monitor as a walkie talkie to speak back to your baby as well as listen
Temperature indicator	Lets you know how warm your baby's room is so you can see the temperature on your parent unit
Night light	Turn on a light on the baby's unit remotely. Or maybe turn it on when you leave, then turn it off later.
Lullabies	Lets you hit a button on the parent unit to play baby a little tune.
Infrared video camera	Infrared video monitors allows the camera to watch your baby in a dark room

# Motorola Sound Monitors

## **MBP11**

Motorola's entry level sound monitor, reliable, good range. The parent unit is battery powered and you plug the baby unit into a powerpoint. Sound from baby unit to parent unit only and has an out of range warning.

## **MBP16**

Motorola's top of the line sound monitor. Benefits over the MBP11 are

- two way communication
- an LCD display with a better battery indicator
- temperature display
- a nightlight on the baby unit
- 5 built in lullabies to help baby back to sleep

# Motorola Video Monitors

## **MBP28**

Motorola's standard video monitor with a 4.6cm screen on the parent unit. The camera has infrared night vision to see in the dark. Also has

- two way sound to talk to baby
- a temperature display
- 3 lullabies
- a timer/alarm and
- an out of range warning

## **MBP36**

Motorola's top of the range video monitor. Has a much bigger screen than the MBP28, better battery life, better range and less likely to get any interference. The camera unit can be controlled from the parent unit to point at different things in the room. You can even plug it into a TV (extra cable) if you want a really big picture!

# Feature Comparison Table

Feature	MBP11	MBP16	MBP28	MBP36
<b>Type</b>	Sound only	Sound only	Video & sound	Video & sound

<b>Sound volume indicator</b>	Yes	Yes	Yes	Yes
<b>Temperature display</b>	No	Yes	Yes	Yes
<b>Night light</b>	No	Yes	No	No
<b>Lullabies</b>	No	5	3	5
<b>Baby unit power</b>	Powerpoint	Powerpoint	Powerpoint	Powerpoint
<b>Parent unit power</b>	Rechargeable battery	Rechargeable battery	Rechargeable battery	Rechargeable battery
<b>Battery life*</b>	12 hours	12 hours	5 hours audio	7 hours audio
<b>Range**</b>	300m	300m	200m	300m

\* This is the manufacturer's specs and will vary depending on use so may be lower

\*\* We think they measure this distance out in an open park. Normal use around a house with walls will make this lower

We hope this helps you find your perfect baby monitor at [Baby.com.au](http://Baby.com.au)!
